

CFW500

Variable Speed Drive

CFW500

Machinery Drive

Endless possibilities

With modern design, the variable speed drive CFW500 is a **high performance** VSD for applications that require speed and torque control of three-phase induction motors. The equipment has **sensorless vector control, closed loop vector control or scalar V/f**. It also has SoftPLC, which adds PLC (programmable logic controller) functions, Pump Genius, which adds dedicated functions for pumping systems and selectable plug-in modules, that **provide a flexible and optimized solution** for any application.

Performance

Sensorless or closed loop vector control, VVW or Scalar V/f

Advanced resources for total control of the application

Flexibility

Expansible number of inputs and outputs as well as functions using plug-in modules with plug-and-play philosophy

Surface or DIN rail mounting, including side-by-side installation

Innovation

SoftPLC - built-in PLC functionalities

USB communication port available with plug-in module

WEG Quality

All VSDs are factory tested at full load conditions and maximum operational temperature

Diagnostics and protections

Current range from 1,0 to 56 A (0,25 kW / 0,33 HP to 30 kW / 40 HP) with supply voltages 200-240, 380-480 or 500-600 V

Built-in braking IGBT (optional)

Fieldbus communication modules for the most used industrial networks, like CANopen, DeviceNet, Profibus-DP, EtherNet-IP, Profinet-IO or Modbus-RTU

Operating ambient temperature up to 50 °C without derating

Ideal for machinery manufacturer

Free WLP and SuperDrive G2 programming softwares available at www.weg.net

Conformal Coating class 3C2 for greater protection of electronic boards against corrosive atmospheres

Internal RFI filter to reduce high-frequency electromagnetic interference signals

Dedicated functions for pumping systems using Pump Genius

Single or three-phase power supply in 200-240 V, 380-480 V or 500-600 V

Memory card for data transfers without the necessity to power the CFW500 up

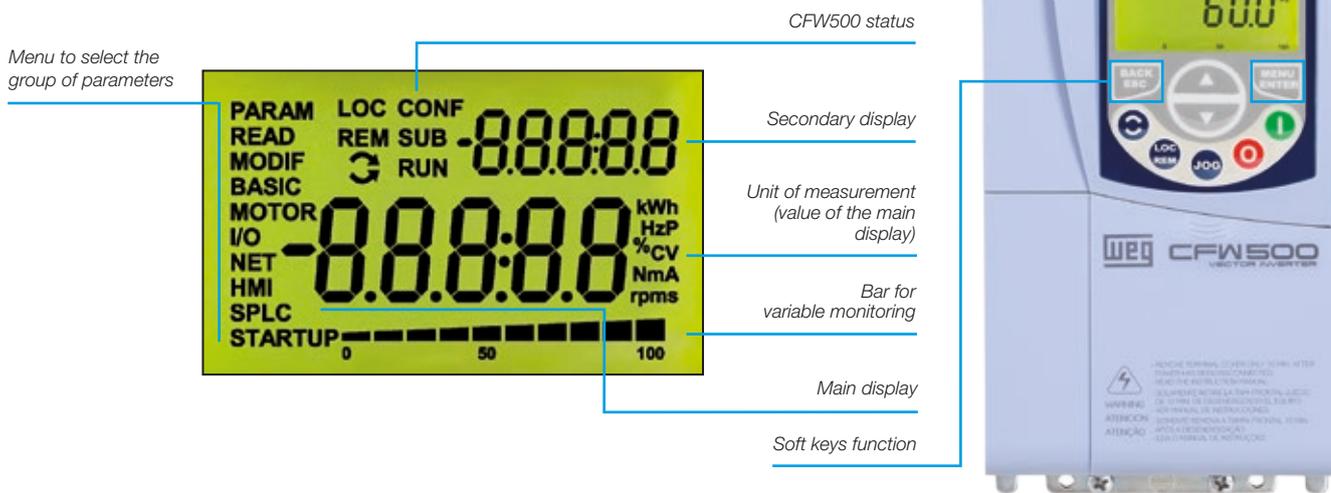

Certifications

Simplified Programming and Operation

Operating Interface (HMI)

- Monitoring, setting of all parameters as well as commands
- Up to three parameters indication on the display, according to user selection
- Oriented start-up and grouped parameters

Note: the operating interface (HMI) of the CFW500 is not removable. For remote operation of the HMI, use the CFW500-HMIR accessory, according to the accessory table on page 15.

Remote Operating Interface (HMI)

Solutions for machine consoles and panels.

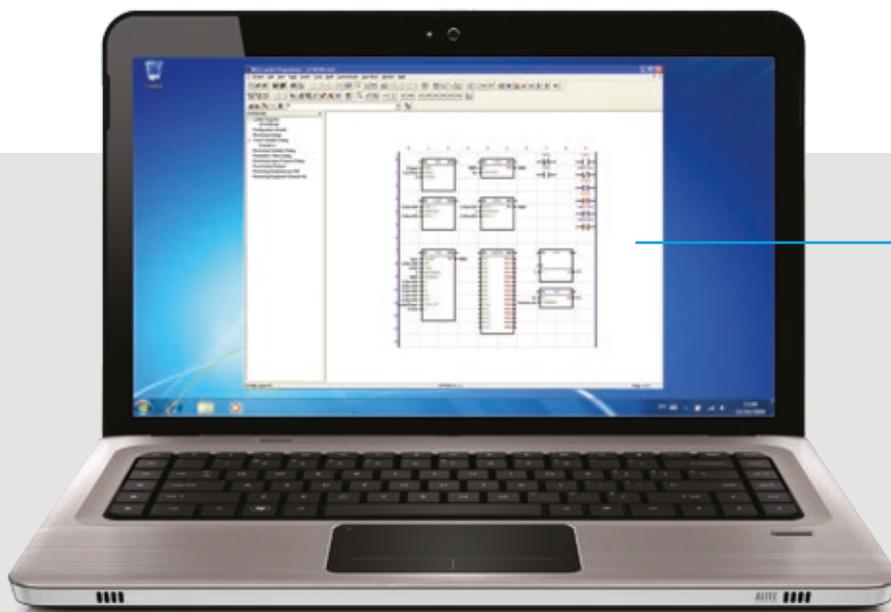

CFW500-HMIR
Accessory

Flexibility and Performance

The CFW500 has a modern design and it can be selected according to the application requirements, providing flexibility with excellent performance. The VSD gives the user the possibility to choose the plug-in module that best fits his application, or to use the standard version, that comes with the CFW500-IOS plug-in module. All plug-in modules comes with one RS485 port as standard.

The installation of the CFW500 is simple and its configuration and operation is intuitive with the navigation menus of the operating interface (HMI) with built-in LCD display. By using the flash memory module, it is possible to download the existing setting from one CFW500 to other units without powering them up.

SoftPLC
It is a software resource added to the CFW500 which allows the user to implement and debug logic projects equivalent to a small PLC (Programmable Logic Controller), customizing and integrating the CFW500 to the application. The free WLP programming software is available at: www.weg.net.

Connectivity

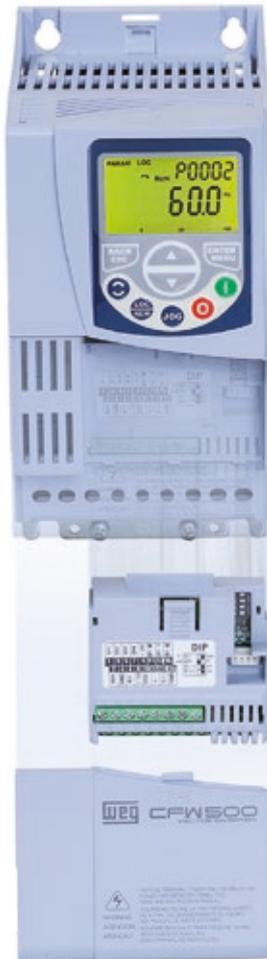

Remote operating interface (HMI) (CFW500-HMIR accessory)

Easy operation and view

Free at www.weg.net

SuperDrive G2

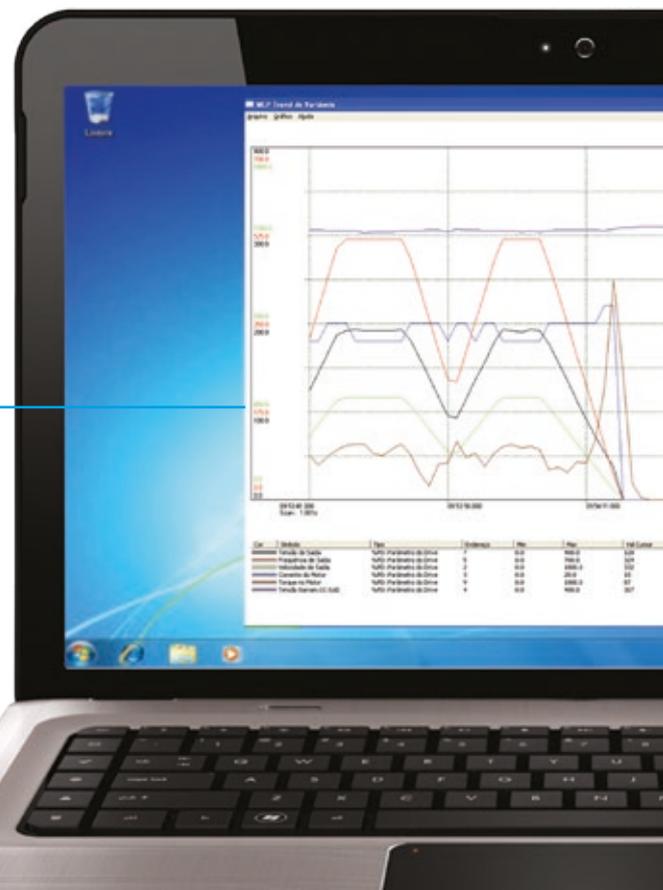

The CFW500 can be connected to the main fast industrial Fieldbus communication networks, with protocols used worldwide such as CANopen, Profibus-DP, DeviceNet, Profinet and EtherNet, according to the plug-in module selected.

In addition, all plug-in modules come with serial interface RS485 Modbus-RTU built-in.

- I/O expansion:
 - IOS (standard, included in the version with plug-in), IOD, IOAD, IOR
- Functionality expansion:
 - Incremental encoder
 - USB
- Fieldbus communication protocols:
 - CANopen
 - DeviceNet
 - RS232
 - RS485
 - Profibus-DP
 - EtherNet-IP
 - Modbus-TCP
 - Profinet-IO

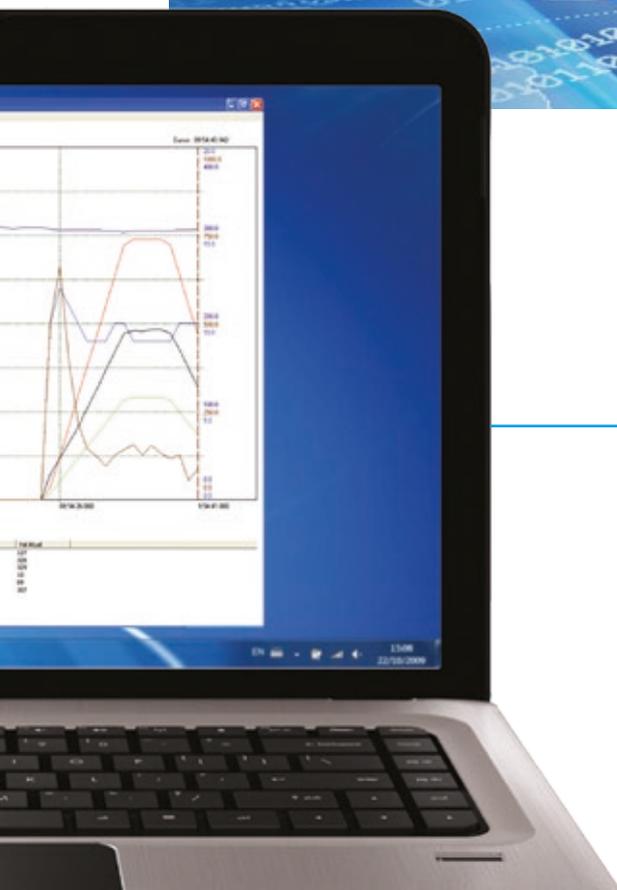

Selectable plug-in modules

USB Connection (CFW500-CUSB accessory)

Features

- Special engineering units (RPM, °C, Nm, mA, %, kW, kWh, among others)
- Password to protect the parameters
- Backup of all parameters (via SuperDrive G2 software, or plugin memory MMF)
- Possibility to save up to two different settings on the memory of the CFW500
- Setting of the switching frequency according to the application requirements
- Speed reference via electronic potentiometer
- Multispeed with up to eight programmable speeds
- Slip compensation
- Manual or automatic torque boost (V/F scalar mode) or self-adjustment (VVW and vector modes)
- Acceleration/deceleration ramps
- "S" type ramp
- DC braking
- Internal dynamic braking (except frame size A)
- PID controller to control processes in closed loop
- Flying start / Ride-through
- Sleep mode
- Skip frequencies or frequency ranges function adjustable
- Overload and overtemperature protection
- Overcurrent protection
- DC link voltage supervision
- Fault log

Using the SuperDrive G2 software, it is possible to change, monitor and view graphically the variables of the CFW500 on a personal computer.

Trend Function

Trend charts for online monitoring of parameters and other variables within the SuperDrive G2 software.

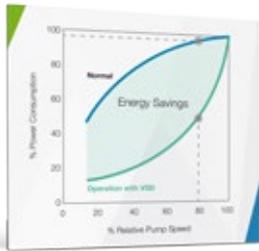

Pump Genius

simplex

The Pump Genius Simplex software adds ideal features to the VSD for single pump control.

multipump

Pump Genius Multipump allows driving two or more pumps with only one inverter.

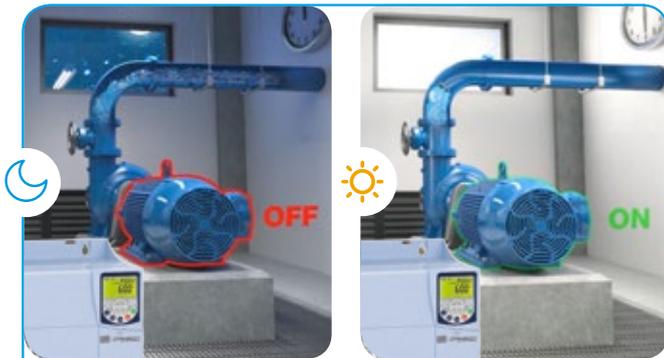

Energy Savings

The use of the CFW500 with the Pump Genius Multipump improves the performance and provides electric energy savings. Using this solution together with WEG W22 Premium motors, and reducing the pump speed even if slightly, it is possible to reduce the electric energy consumption by approximately 15%, thus contributing to the sustainable development of the planet.

Broken Pipe Alarm

Pump Genius detects when the pump is consuming more electric energy than it should, by means of information on the pump load and speed, automatically generating an alarm warning of leaky pipes. In addition, with the monitoring of the system pressure, a clogging condition may be detected by configuring the maximum pressure to trigger the alarm of clogged pipe.

Sleep and Wake up Function

The sleep function keeps the pump in the standby mode when the demand or flow is below the minimum, avoiding that it runs at low speed for long periods, providing electric energy savings and increasing the lifetime of the pump. The wake up function restarts the drive automatically when the pressure falls below the set point.

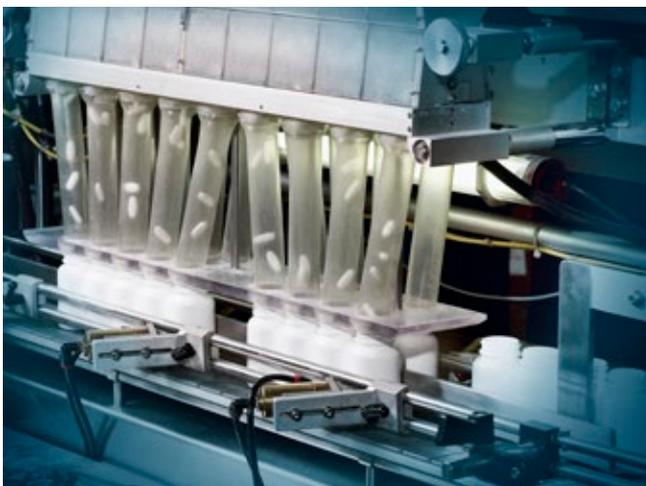

Pipe Charging Function

It allows lubrication and smooth initial charging of the pipes, making the pump operate at a lower preset speed for a certain time, avoiding "Water Hammers", which may damage the piping system.

Note: find out more about Pump Genius visiting our website www.weg.net.

Applications

| | | | |
|---|--|--|--|
| <p>Extruders</p>  | <p>Conveyor belts</p>  | <p>Roller tables</p>  | <p>Fans / exhausters</p>  |

Notes: 1) Braking resistor not included.

2) Conducted emission level (IEC 61800-3).

In order to minimize such problem, WEG variable speed drives contain common-mode capacitive filters, which are enough to avoid this type of interference in most cases. If necessary, our inverters also have radio frequency (RFI) filters to reduce even more those high-frequency electromagnetic interference signals. Item 8 of the table above shows how to select the models of internal RFI filters for the CFW500.

Definitions of IEC/EN 61800-3 standard. Categories:

Category C1: variable speed drives with voltage rating below 1,000 V and intended for application in the "First Environment".

Category C2: inverters with voltage rating below 1,000 V not provided with plugs or movable installations, and, when applied in the "First Environment", they must be installed and commissioned by a professional.

Category C3: inverters with voltage ratings below 1,000 V developed for application in the "Second Environment" and not designed for application in the "First Environment".

Environments: First Environment: environments that include domestic installations, such as establishments directly connected without intermediate transformers to the low voltage power line, which supplies buildings used for domestic purposes.

Second environment: environments that include all the buildings other than those directly connected to the low voltage power line, which supplies buildings used for domestic purposes.

For RFI filters installed externally, refer to the CFW500 user manual.

Notes: 1) The power values for maximum applicable motor shown in the table above are reference values and valid for WEG motors. IEC motor powers are based on motor WEG four-pole W22 High Efficiency IE2 three-phase induction motors with power supply of 220 V, 230 V, 415 V, 460, 525 or 575 V. NEMA motor power are based on WEG four pole W22 Premium. Motor rated currents may vary with speed and manufacturer, use the motor power ratings below only as a guidance. The proper sizing of the CFW500 to be used must be determined as a function of the rated current of the motor used.

2) Included in this reference the CFW500-IOS standard plug-in module. Smart code without "H00".

N/A = Not applicable.

Specification

CFW500 without Plug-In Module

You must select the smart code of the CFW500 without plug-in module (CFW500 xxx H00) + smart code of the desired plug-in module.

Notes: 1) The power values for maximum applicable motor shown in the table above are reference values and valid for WEG motors. IEC motor powers are based on motor WEG four-pole W22 High Efficiency IE2 three-phase induction motors with power supply of 220 V, 230 V, 415 V, 460, 525 or 575 V. NEMA motor power are based on WEG four pole W22 Premium. Motor rated currents may vary with speed and manufacturer, use the motor power ratings below only as a guidance. The proper sizing of the CFW500 to be used must be determined as a function of the rated current of the motor used.

2) No plug-in module included in this reference. A plug-in module must be added according to the table on page 15.

N/A = Not applicable.

Notes: 1) The power values for maximum applicable motor shown in the table above are reference values and valid for WEG motors. IEC motor powers are based on motor WEG four-pole W22 High Efficiency IE2 three-phase induction motors with power supply of 220 V, 230 V, 415 V, 460, 525 or 575 V. NEMA motor power are based on WEG four pole W22 Premium. Motor rated currents may vary with speed and manufacturer, use the motor power ratings below only as a guidance. The proper sizing of the CFW500 to be used must be determined as a function of the rated current of the motor used.

2) No plug-in module included in this reference, only RFI filter. A plug-in module must be added according to the table on page 15.
N/A = Not applicable.

Specification

Plug-In Module Selection

On the CFW500, it is possible leave to choose later the model of the internal plug-in module by entering H00 in item 9 of the smart code. In this case, it is necessary to select the plug-in module as an accessory, according to the table bellow. In case H00 is not selected in item 9 of the smart code, the CFW500 will be supplied with the CFW500-IOS plug-in. You must always use one plug-in module per CFW500.

| Reference | Description | Illustrative figures |
|-----------------------------------|---|---|
| | Input and output (I/O) expansion | |
| CFW500-IOS ¹⁾ | Standard plug-in module (included in the version with plug-in module) |  |
| CFW500-IOD | Digital input and output (I/O) expansion plug-in module | |
| CFW500-IOAD | Digital and analog input and output (I/O) expansion plug-in module | |
| CFW500-IOR | Relay output expansion plug-in module | |
| Functionality expansion | | |
| CFW500-ENC | Plug-in module with encoder input | |
| CFW500-CUSB | Plug-in module with USB port | |
| Communication on Fieldbus network | | |
| CFW500-CCAN | CAN communication plug-in module (CANopen/DeviceNet) | |
| CFW500-CRS232 | RS232 communication plug-in module | |
| CFW500-CRS485 | RS485 communication plug-in module | |
| CFW500-CPDP | Profibus-DP communication plug-in module | |
| CFW500-CETH-IP | EtherNet-IP communication plug-in module | |
| CFW500-CEMB-TCP | Modbus-TCP communication plug-in module | |
| CFW500-CEPN-IO | Profinet IO communication plug-in module | |

Note: 1) Accessory already included if the CFW500 version with the standard plug-in module is selected. The plug-in modules can also be sold separately as an accessory item or spare part.

Configuration of the Plug-In Modules¹⁾

| Plug-in module | Functions | | | | | | | | | | | | | | | |
|-----------------|-----------------|--------|---------|---------------|--------------------|----------|---------------------------------|-------------------|-------|-------|-------------|-------------|------------|-------------|--------|------|
| | Inputs | | Outputs | | | USB port | Input for Encoder ³⁾ | Fieldbus networks | | | | | | | Supply | |
| | Digital | Analog | Analog | Digital relay | Digital transistor | | | CANopen DeviceNet | RS232 | RS485 | Profibus-DP | EtherNet-IP | Modbus-TCP | Profinet-IO | 10 V | 24 V |
| CFW500-IOS | 4 | 1 | 1 | 1 | 1 | - | - | - | - | 1 | - | - | - | - | 1 | 1 |
| CFW500-IOD | 8 | 1 | 1 | 1 | 4 | - | - | - | - | 1 | - | - | - | - | 1 | 1 |
| CFW500-IOAD | 6 | 3 | 2 | 1 | 3 | - | - | - | - | 1 | - | - | - | - | 1 | 1 |
| CFW500-IOR | 5 ²⁾ | 1 | 1 | 4 | 1 | - | - | - | - | 1 | - | - | - | - | 1 | 1 |
| CFW500-ENC | 5 ²⁾ | 1 | 1 | 4 | 1 | - | 1 | - | - | 1 | - | - | - | - | 1 | 1 |
| CFW500-CUSB | 4 | 1 | 1 | 1 | 1 | 1 | - | - | - | 1 | - | - | - | - | 1 | 1 |
| CFW500-CCAN | 2 | 1 | 1 | 1 | 1 | - | - | 1 | - | 1 | - | - | - | - | 1 | - |
| CFW500-CRS232 | 2 | 1 | 1 | 1 | 1 | - | - | - | 1 | 1 | - | - | - | - | - | 1 |
| CFW500-CRS485 | 4 | 2 | 1 | 2 | 1 | - | - | - | - | 2 | - | - | - | - | 1 | 1 |
| CFW500-CPDP | 2 | 1 | 1 | 1 | 1 | - | - | - | - | 1 | 1 | - | - | - | - | 1 |
| CFW500-CETH-IP | 2 | 1 | 1 | 1 | 1 | - | - | - | - | 1 | - | 1 | - | - | - | 1 |
| CFW500-CEMB-TCP | 2 | 1 | 1 | 1 | 1 | - | - | - | - | 1 | - | - | 1 | - | - | 1 |
| CFW500-CEPN-IO | 2 | 1 | 1 | 1 | 1 | - | - | - | - | 1 | - | - | - | 1 | - | 1 |

Note: 1) All plug-in models have at least one RS485 port. The CFW500-CRS485 plug-in module has two RS485 ports. The CFW500 allows the installation of one plug-in module per unit.
 2) The digital inputs are always NPN, and it cannot be configured for PNP like the others.
 3) Incremental Encoder (A/A - B/B).
 See the installation guides of the plug-in modules on the website www.weg.net

Specification

Optional Items

They are hardware resources added to the CFW500 in the manufacturing process, and they should be requested via smart code.

Internal Dynamic Braking (IGBT)¹⁾

Used for quick stop of the motor with external²⁾ braking resistor.

The braking IGBT is available as standard in frames B, C, D and E (“DB” must be inserted in the item 8 of the smart code).

Notes: 1) Not available for frame size A.

2) External braking resistor not included. To specify the correct braking resistor, please refer to the CFW500 User's Manual.

NEMA1 Protection Kit (N1)

Insert “O...N1” in item 7 of the smart code, in frame sizes A, B, C, D and E.

According to the National Electrical Manufacturers Association (NEMA)³⁾ standard, Type 1.

- Protecting against penetration of foreign solid objects (falling dust)
- Prevents access to hazardous parts
- Can also be added separately (see accessories)

Notes: 3) Not recommended for external use, only indoor applications or inside enclosures.

4) Image of frame size A with NEMA1 kit.

Internal RFI Filter

The RFI filters installed on the CFW500 inverters are used to reduce the disturbance conducted from the inverter to the power line in the high frequency band (>150 kHz). If it is necessary to comply with the maximum emission levels of the electromagnetic compatibility standards, such as EN 61800-3 and EN55011, it is necessary to add an internal RFI filter to the CFW500, by means of filling C2 or C3 in item 8 of the smart code.

Specification

Optional Items

Conformal Coating

The standard version of the CFW500 offers protection class 3C2, according to IEC 60721-3-3, ensuring greater protection for applications in environments with corrosive chemicals.

It is possible to request an extra coating on the internal circuit boards, Protection Class 3C3, according to IEC 60721-3-3, by adding EC to item 9 of the smart code, ensuring even greater protection for applications in harsh corrosive environment.

Note: in order to select the CFW500 without plug-in module (H00) and with extra coating on the internal circuit boards (HEC), H00EC must be filled in item 9 of the smart code.

Pump Genius

To use CFW500 with the Pump Genius Simplex or Multipump, contact the WEG Automation sales department.

Accessories

The accessories are hardware resources that may be added to the CFW500 in the application, according to the table below:

| Reference | Description | Illustrative figures |
|--------------------|---|---|
| | Memory | |
| CFW500-MMF | Flash memory module |  |
| Interfaces | | |
| CFW500-HMIR | Remote operating interface (HMI) |  |
| CFW500-CCHMIR1M | 1-meter cable set for remote operating interface (HMI) | |
| CFW500-CCHMIR2M | 2-meter cable set for remote operating interface (HMI) | |
| CFW500-CCHMIR3M | 3-meter cable set for remote operating interface (HMI) | |
| CFW500-CCHMIR5M | 5-meter cable set for remote operating interface (HMI) | |
| CFW500-CCHMIR75M | 7.5-meter cable set for remote operating interface (HMI) | |
| CFW500-CCHMIR10M | 10-meter cable set for remote operating interface (HMI) | |
| Description | | |

Notes: 1) For UL protections, consult WEG Automation sales department.

2) Protection of the electrical circuit only. In order to protect the VSDs, use the recommended semiconductor fuses.

3) The first value refers to the single-phase power supply and the second value to the three-phase power supply.

4) Designed for exclusive industrial or professional use.

Sizes

| Size | A | B | C | D | H | L | P | Weight |
|------|-------|-------|------|------|-------|-------|-------|--------|
| | mm | mm | mm | mm | mm | mm | mm | kg |
| A | 50.0 | 175.0 | 11.9 | 7.2 | 189.0 | 75.0 | 150.0 | 0.8 |
| B | 75.0 | 185.0 | 11.8 | 7.3 | 199.0 | 100.0 | 160.0 | 1.2 |
| C | 100.0 | 195.0 | 16.7 | 5.8 | 210.0 | 135.0 | 165.0 | 2.0 |
| D | 125.0 | 290.0 | 27.5 | 10.2 | 306.6 | 180.0 | 166.5 | 4.3 |
| E | 150.0 | 330.0 | 34.0 | 10.6 | 350.0 | 220.0 | 191.5 | 10.0 |

Note: for the dimensions in the NEMA version, refer to the user manual.

Standards

| Standards | | UL 508C - Power conversion equipment |
|--|--|--------------------------------------|
| | | Safety standards |
| EN 61800-5-1 - Safety requirements electrical, thermal and energy | | |
| EN 50178 - Electronic equipment for use in power installations | | |
| EN 60204-1 - Safety of machinery. Electrical equipment of machines. Part 1: general requirements Note: In order to have a machine in accordance with this standard, the manufacturer of the machine is responsible for installing an emergency stop device and a device for disconnection from the power line | | |
| EN 60146 (IEC 146) - Semiconductor converters | | |
| EN 61800-2 - Adjustable speed electrical power drive systems - Part 2: general requirements - Rating specifications for low voltage adjustable frequency AC power drive systems | | |
| Electromagnetic compatibility standards | EN 61800-3 - Adjustable speed electrical power drive systems - Part 3: EMC product standard including specific test methods | |
| | EN 55011 - Limits and methods of measurement of radio disturbance characteristics of industrial, scientific and medical (ISM) radio-frequency equipment | |
| | CISPR 11 - Industrial, scientific and medical (ISM) radio-frequency equipment - Electromagnetic disturbance characteristics - Limits and methods of measurement | |
| | EN 61000-4-2 - Electromagnetic compatibility (EMC) - Part 4: testing and measurement techniques - Section 2: electrostatic discharge immunity test | |
| | EN 61000-4-3 - Electromagnetic compatibility - Part 4: testing and measurement techniques - Section 3: radiated, radio-frequency, electromagnetic field immunity test | |
| | EN 61000-4-4 - Electromagnetic compatibility - Part 4: testing and measurement techniques - Section 4: electrical fast transient/burst immunity test | |
| | EN 61000-4-5 - Electromagnetic compatibility - Part 4: testing and measurement techniques - Section 5: surge immunity test | |
| | EN 61000-4-6 - Electromagnetic compatibility - Part 4: testing and measurement techniques - Section 6: immunity to conducted disturbances, induced by radio-frequency fields | |
| Mechanical construction standards | EN 60529 - Degrees of protection provided by enclosures (IP code) | |
| | UL 50 - Enclosures for electrical equipment | |

Technical Specifications

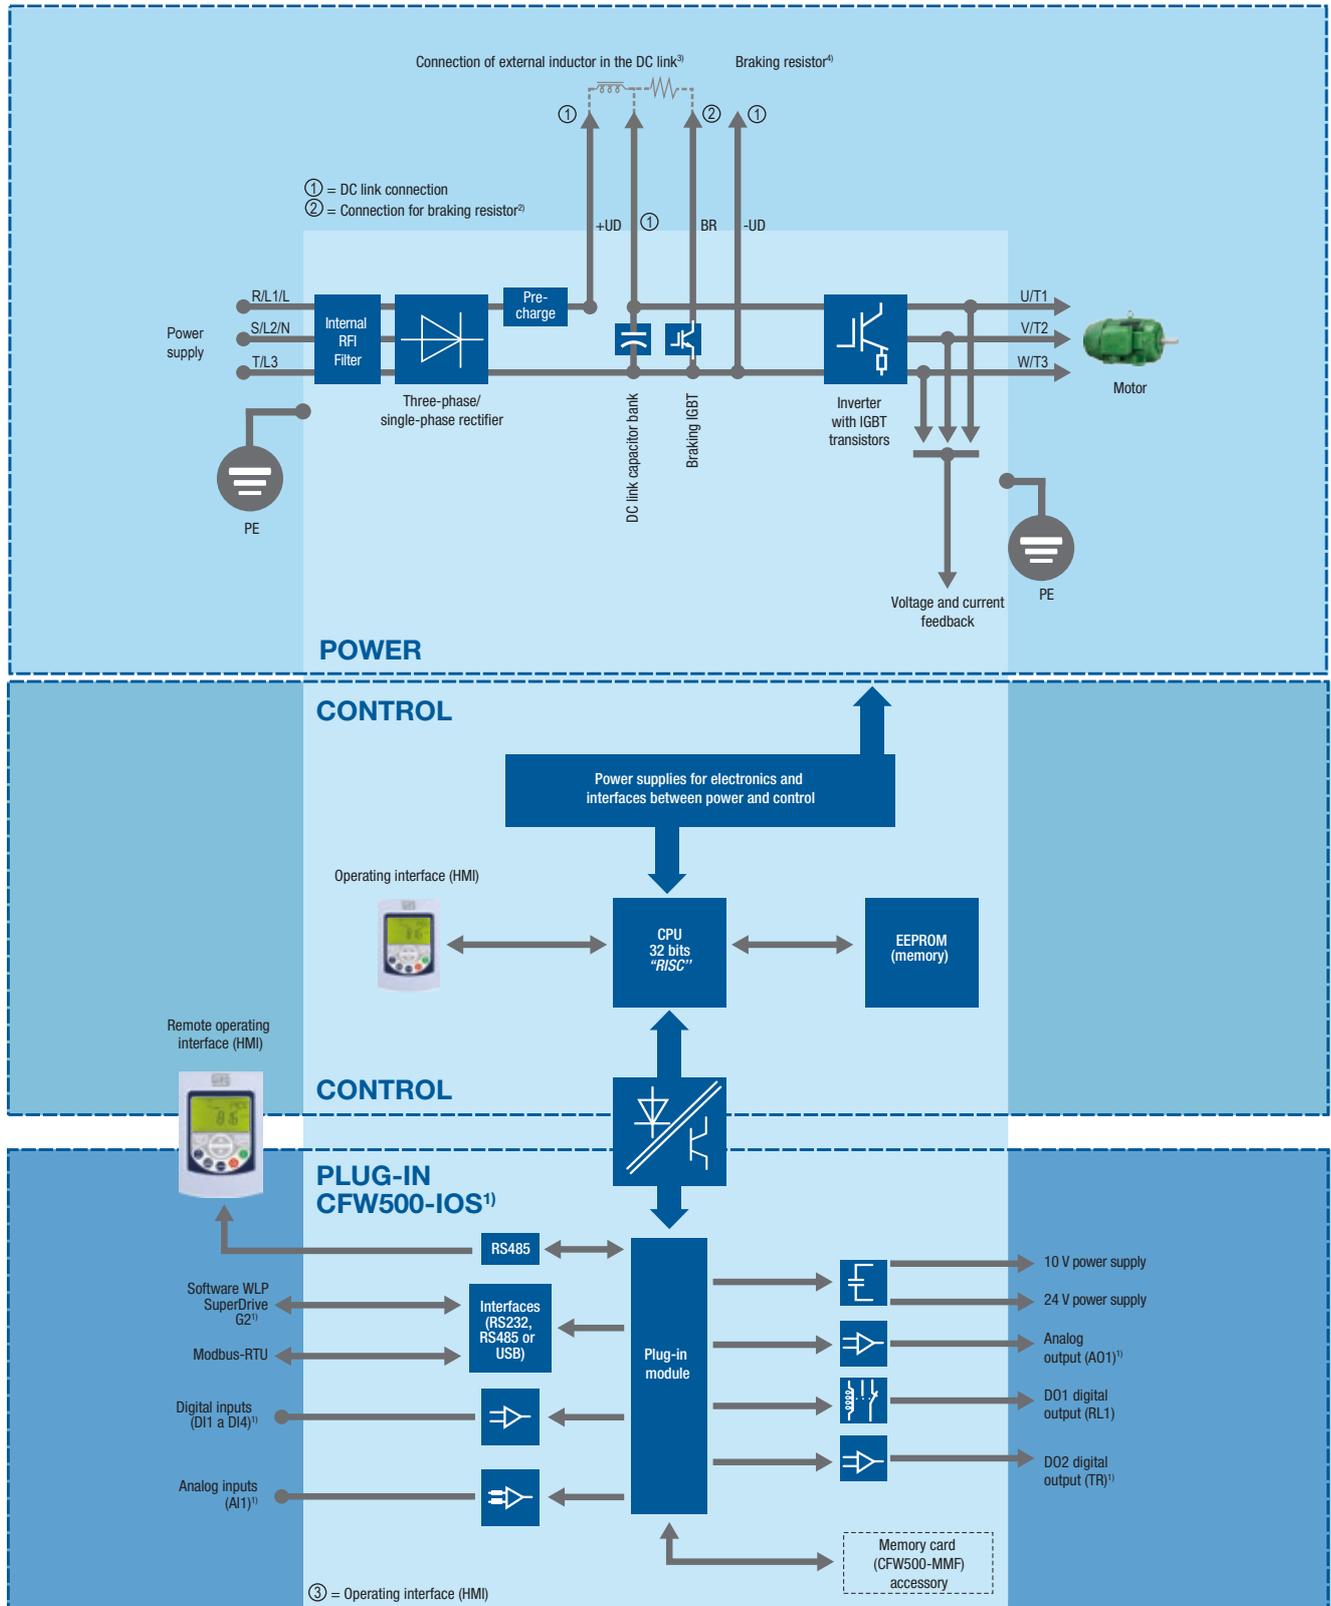

| | | |
|---------------------------|--------------------------------|---|
| Power rating | Power supply | Tolerance: -15 to +10% |
| | | Frequency: 50/60 Hz (48 Hz to 62 Hz) |
| | | Phase imbalance: ≤3% of the rated phase-phase input voltage |
| | | Transient voltages and overvoltages according to Category III (EN 61010/UL 508C) |
| | | Maximum of 10 (line) connections per hour (1 every 6 minutes) |
| | | Typical efficiency: ≥97% |
| Control | Method | V/F (scalar) VW: voltage vector control Vector without encoder (sensorless) and closed loop vector with encoder PWM SVM (space vector modulation) |
| | Output frequency | 0 to 500 Hz, resolution of 0.015 Hz |
| Performance | V/F Control | Speed regulation: 1% of the rated speed (with slip compensation) Speed variation range: 1:20 |
| | Vector control (VWV) | Speed regulation: 1% of the rated speed Speed variation range: 1:30 |
| | Sensorless | Speed regulation: 0.5% of the rated speed Speed variation range: 1:100 |
| | Vector control with Encoder | Speed regulation: ±0.01% of the rated speed Speed variation range: 1:100 |
| Environment conditions | Temperature around the CFW500 | 0 °C to 40 °C - NEMA1 0 °C to 40 °C - IP20 side by side and / or with RFI filter 0 °C to 50 °C - IP20 without RFI filter For temperatures above the specification, it is necessary to apply a 2% of current derating for each degree Celsius (°C), limited to an increase of 10 °C |
| | Aggressive environments | Protection Class 3C2 - Standard coating on the internal circuits, according to IEC 60721-3-3 (standard model) Protection Class 3C3 - Extra coating - optional, according to IEC 60721-3-3 (optional) |
| | Air relative humidity | 5% to 95% non-condensing |
| | Altitude | Up to 1,000 m (maximum altitude under normal conditions) 1,000 to 4,000 m: current derating of 1% for each 100 m above 1,000 m of altitude |
| | Pollution degree | 2 (EN 50178 and UL 508C), with non-conductive pollution Condensation must not cause conduction of the accumulated residues |
| Inputs ¹⁾ | Analog | 1 isolated input. Levels: (0 to 10) V or (0 to 20) mA or (4 to 20) mA Linearity error ≤0.25% Impedance: 100 kΩ for voltage input, 500 Ω for current input Programmable functions Maximum voltage accepted in the inputs: 30 V dc |
| | Digital | 4 isolated inputs Programmable functions: Active high (PNP): maximum low level of 15 V dc; minimum high level of 20 V dc Active low (NPN): maximum low level of 5 V dc; minimum high level of 9 V dc Maximum input voltage of 30 V dc Input current: 4.5 mA Maximum input current: 5.5 mA |
| Outputs ¹⁾ | Analog | 1 isolated output. Levels (0 to 10) V or (0 to 20) mA or (4 to 20) mA Linearity error ≤0.25% Programmable functions RL ≥10 kΩ (0 to 10 V) or RL ≤500 Ω (0 to 20 mA / 4 to 20 mA) |
| | Relay | 1 relay with NO/NC contact Maximum voltage: 240 V ac Maximum current of 0.5 A Programmable functions |
| | Transistor | 1 isolated open sink digital output (using as reference the 24 V dc power supply) Maximum current of 150 mA (maximum capacity of the 24 V dc power supply) ²⁾ Programmable functions |
| | Power supply | 24 V dc power supply. Maximum capacity: 150 mA ²⁾ Power supply of 10 V dc. Maximum capacity: 2 mA |
| Communication | Selectable plug-in | Fieldbus: CANopen, DeviceNet, Profibus-DP, EtherNet-IP, Modbus-TCP, Profinet-IO USB, RS485 and RS232 ports |
| Safety | Protection | Phase-phase overcurrent/short circuit in the output Phase-ground overcurrent/short circuit in the output Undervoltage/overvoltage in the power Overtemperature of the heatsink Motor overload Overload on the power module (IGBTs) External fault / alarm Programming error |
| Operating interface (HMI) | Standard (built in the CFW500) | 9 keys: Run/Stop, Increment, Decrement, Direction of rotation, Jog, Local/Remote, Back/Esc and Enter/Menu LCD Display It allows accessing/changing all the parameters Accuracy of the indications: Current: 5% of the rated current Speed resolution: 0.1 Hz |
| Protection degree | IP20 | Sizes A, B, C, D and E |
| | NEMA1/IP20 | Sizes A, B, C, D and E with NEMA1 kit |

Notes: 1) The number and/or types of analog/digital inputs/outputs may vary according to the plug-in module (accessory) used. In the table above, the standard plug-in module (CFW500-IOS) was taken into account. For further information, refer to the CFW500 user manual.

2) The maximum capacity of 150 mA considers the load of the 24 V power supply plus the transistor output, that is, the sum of the consumption of both must not exceed 150 mA.

3) Designed for exclusive industrial or professional use.

Block Diagram

Notes: 1) The number of inputs and outputs (analog and digital), as well as other resources, may vary according to the plug-in module used. For further information, refer to the CFW500 user manual.

2) Not available for size A.

3) Available for sizes D and E only. Inductor on the DC link not included.

4) Resistor not included. Internal dynamic braking (IGBT) built-in on sizes B, C, D and E.

Global presence is essential, as much as understanding your needs.

Global Presence

With more than 30,000 employees worldwide, WEG is one of the largest electric motors, electronic equipments and systems manufacturers. We are constantly expanding our portfolio of products and services with expertise and market knowledge. We create integrated and customized solutions ranging from innovative products to complete after-sales service.

WEG's know-how guarantees our **CFW500** are the right choice for your application and business, assuring safety, efficiency and reliability.

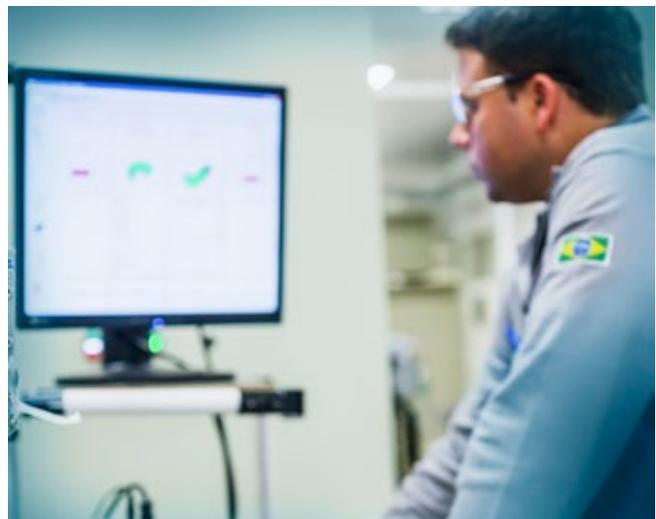

Availability is to have a global support network

Partnership is to create solutions that suits your needs

Competitive edge is to unite technology and innovation

Know More

High performance and reliable products to improve your production process.

Excellence is to provide a whole solution in industrial automation that improves our customers productivity.
